Introduction

Identifying "Gold Mines" and "Money Pits" in our Marketing Spend.

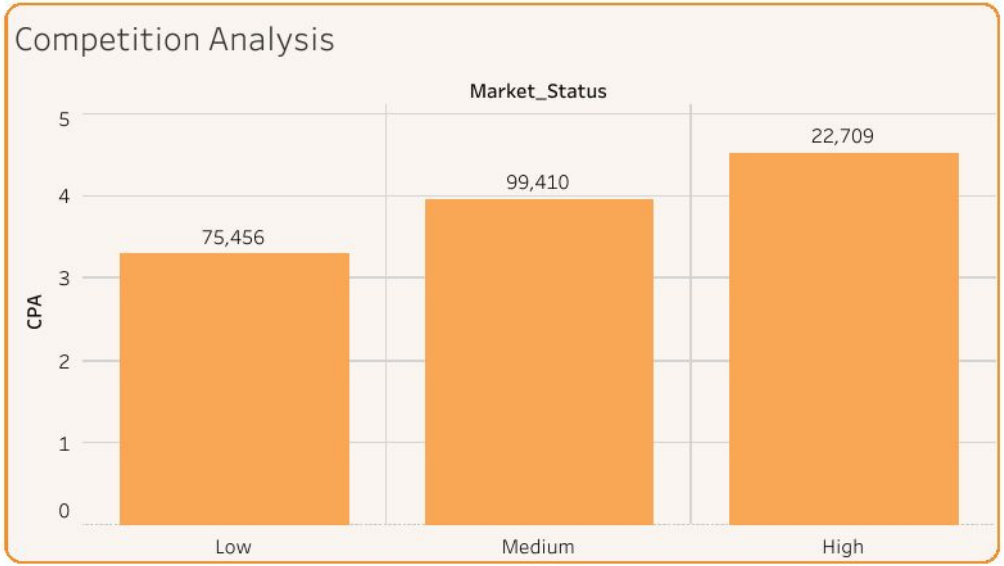
"We aren't just looking at sales; we are looking at the **efficiency of every dollar spent**."

Project Overview

- **Objective:** To **identify high-value marketing opportunities** and reduce wasted ad spend.
- **Dataset:** Analysis of sales performance **across products, regions, and competition tiers**.
- **Key Metric:** Focus on the **LTV to CAC Ratio** (the ultimate health check for our marketing).

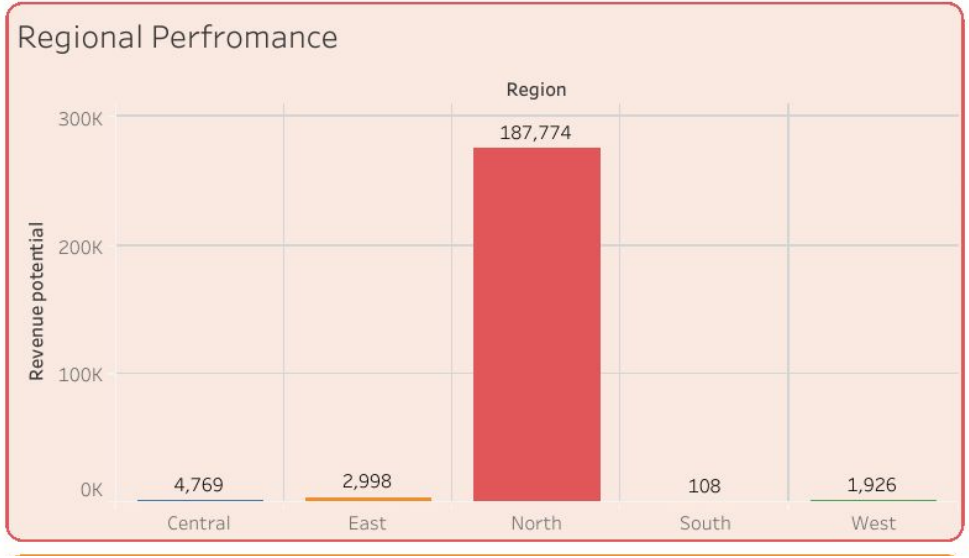
Key Insight

- High-competition markets are **1.3 times more expensive** to enter than low-competition ones.
- **Low CPA** in low competition markets **favour higher amount of Ad-spend**



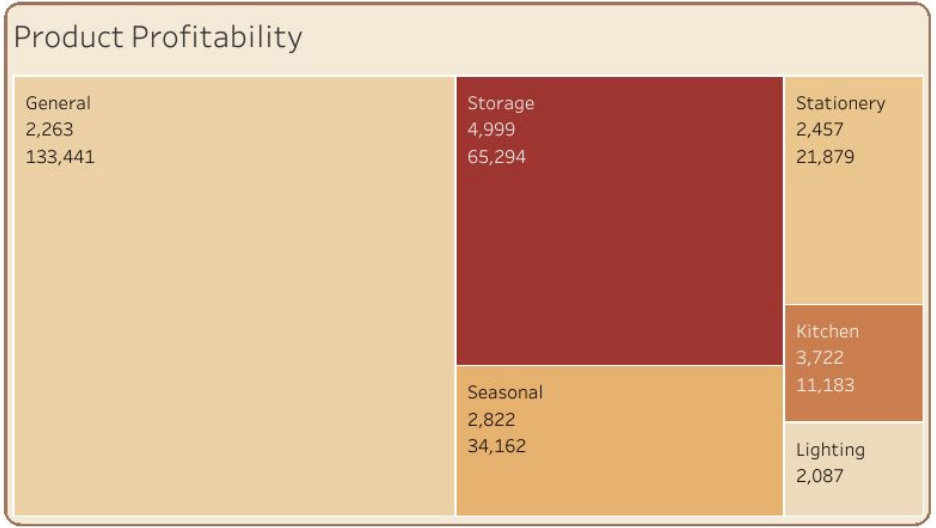
Key Insight

- **North region** shows highest potential for revenue
- Ripe for **expansion**
- Higher ad-spend generates high revenue in this region



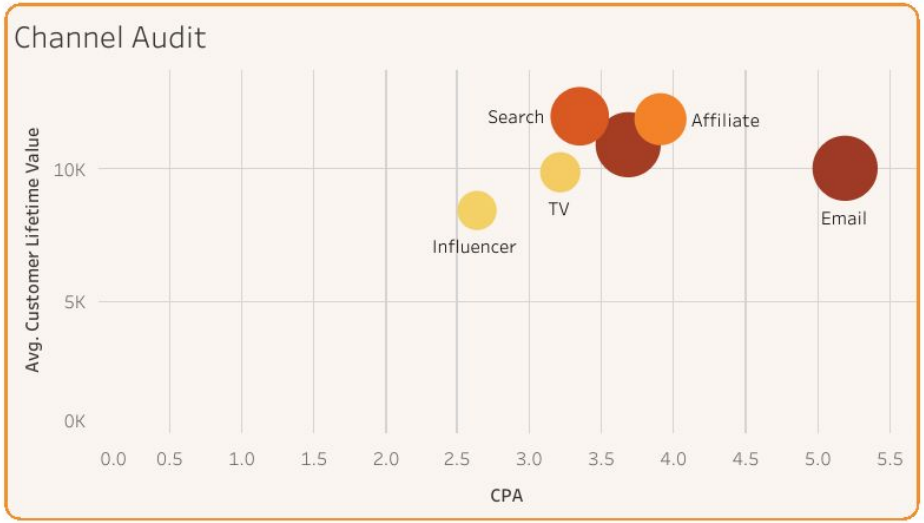
Key Insight

- **Storage** is our revenue leader, but **General** is our profitability leader.
- **long-term wealth** in the General category, while Storage keeps the **volume high.**



Key Insight

- **Email** = High cost and high customer value
- **Search, TV and Social Media** = Lower cost but high customer value
- **Influencer** = Lowest cost and lowest customer value



Next Steps

Efficiency Gains

Focus spend to **Social Media, TV and Search** having the strongest CLV-to-CPA ratios.

Use **Email selectively** for high-value customer segments

Regional Strategy

Focus expansion in **North Region** where higher ad spend consistently drives higher revenue.

Maintain presence in other regions but allocate proportionally less budget to maximize ROI.

Revenue Growth

"Aggressive Ad Spend" to **"Retention & Conversion Optimization."** - Use **Offers, Bundles, and Discounts**.

Market Strategy

Upscale and spend more in the **low-competition markets - the "Blue Ocean"-** while the acquisition cost is low

“This strategy positions us not just to grow, but to grow wisely — maximizing ROI while building sustainable customer relationships.”

Call to Action

- Shift mindset from **spend-heavy acquisition** to **smart retention and conversion optimization**.
- Commit to **continuous monitoring** of CPA and CLV to stay agile.
